

Arlington Bridge Project Reduces Traffic to Two Lanes

Sept. 3 Through Nov. 24

This highway improvement is located approximately ten miles west of Rolla, Mo., on the east-bound side of Interstate 44 in Phelps County.

Traffic will be reduced to two lanes between mile markers 173 and 175 through the entire duration of the project, which is slated for completion by Nov. 24, 2008. Eastbound traffic will be diverted onto the westbound lanes resulting in two-way traffic for approximately 1.5 miles.

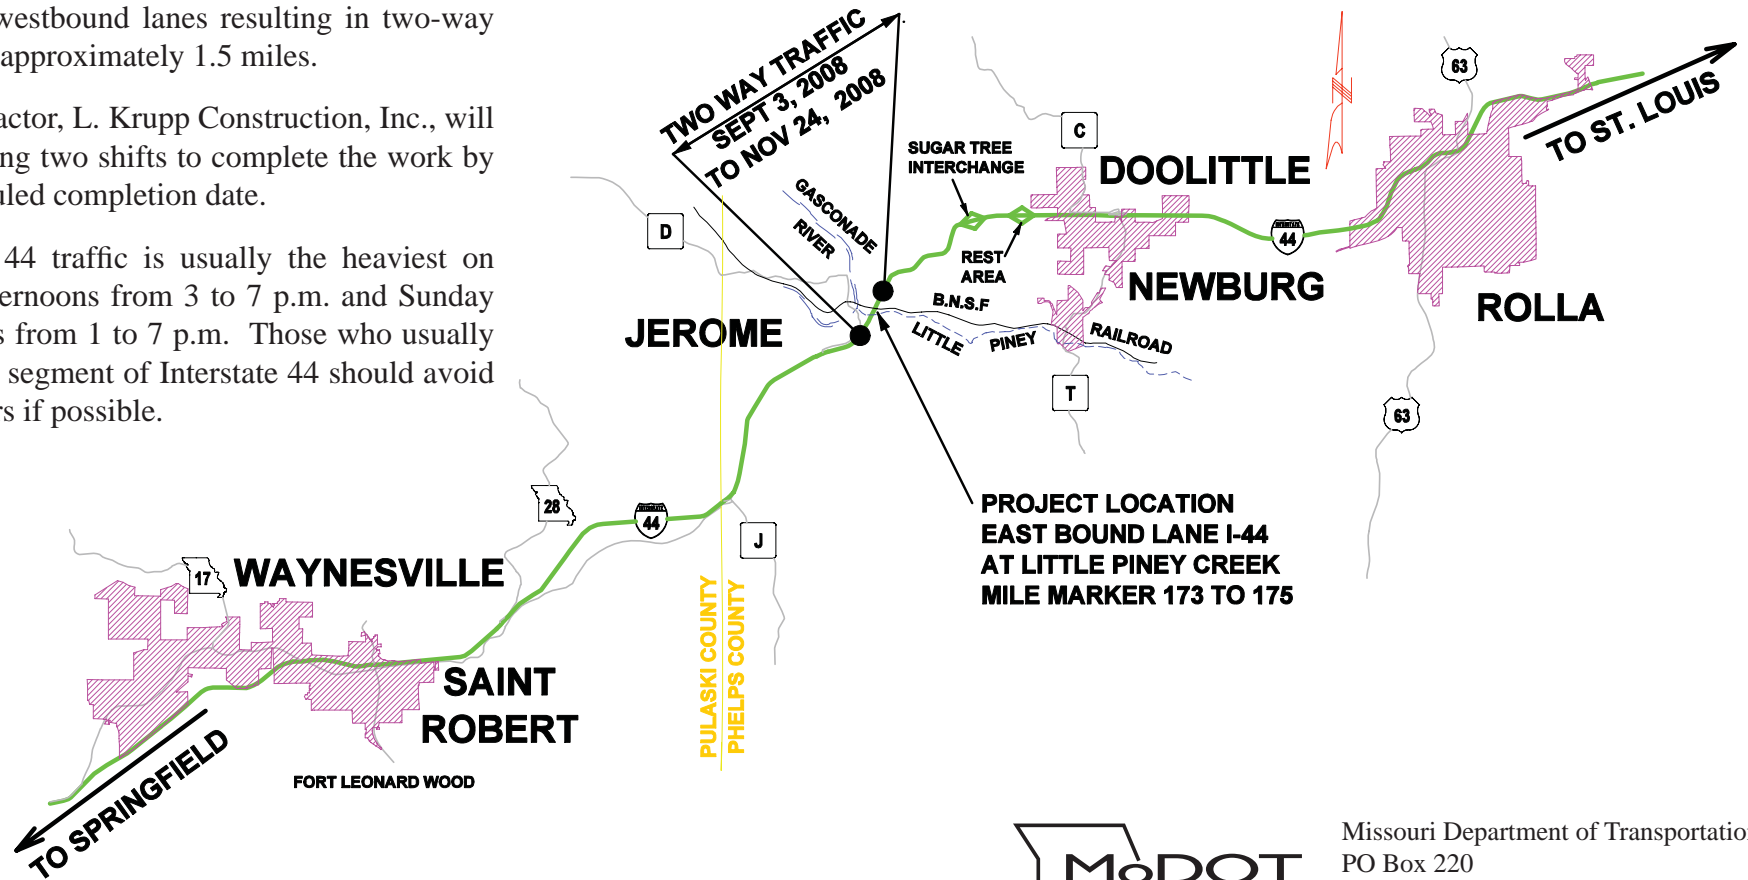

The contractor, L. Krupp Construction, Inc., will be operating two shifts to complete the work by the scheduled completion date.

Interstate 44 traffic is usually the heaviest on Friday afternoons from 3 to 7 p.m. and Sunday afternoons from 1 to 7 p.m. Those who usually travel this segment of Interstate 44 should avoid these hours if possible.

Motorists will be informed of traffic conditions via electronic message signs placed in advance of the construction site. Those wishing to avoid the construction area are urged to seek alternate routes.

Normal over-width and over-dimension permit restrictions are in effect.
